RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-7, 12-26 and 28-49**, directed towards a snowmobile comprising a frame, drive train and details of the same, classified in class 180, subclass 190.
 - II. **Claims 8-11, 27 and 50-55**, directed towards a planetary gear system for a vehicle/snowmobile, classified in class 475, subclass 347.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the drive train of a snowmobile does not require a planetary gear arrangement, but other types of drive components. The subcombination has separate utility such as cars and trucks not intended for travel on snow.

Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.
